PRELIMINARY AMENDMENT

HONORABLE SIR:

Prior to examination on the merits, please enter the following preliminary amendments and consider the following remarks. As set forth below, claim 1 is amended to explicitly recite the structure that is implicitly claimed in a functional limitation. Accordingly, as discussed in the remarks below, the amendment further clarifies the claim limitations and is not a narrowing amendment. Additionally, two (2) new independent claims are added, and one (1) dependent claim is added. Accordingly, upon entry of the amendments, twenty-six (26) claims are pending in the application, of which three (3) are independent.

Marked-up versions of replacement paragraphs in the specification and amended claims are provided on separate pages following the amendments and show the changes relative to the previous version of the paragraphs and claims, respectively.
